1. The four main pillars of sustainable developments are: Social, Economic, Environmental and Cultural.
2. The Agenda 2030 is the set of 17 Sustainable development goals. It is outlined by Europe, and it includes different topic such as for instance good health and well-being, affordable and clean energy and climate action. It is a real European action plan to obtain sustainable and inclusive development, making sure that no one is left behind by 2030.

### 3. Primary energy demand sketch.

Energy vectors

- 4. The circular economy is a model of production and consumption that involves different steps: first the extraction of raw materials, the design, the production, the distribution, the reuse and repair, the collection and the recycling. It lets to share, reuse, repair, recycling existing materials and products for as long as possible. It is completely different from the linear economy.**
- 5. They can be classified in 2 different ways. The first classification is: Primary and Secondary resources. The second classification is: Traditional and renewables.**
