

ADD-ON-SKILLS project as a starting point to future ideas, cooperation and benefits for stakeholders

Aleksejs Zorins

Rezekne Academy of Technologies

Future cooperation

Continuation of Erasmus projects in related fields of studies:

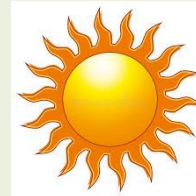

- developing new forms and innovating teaching materials;
- modern education directions for students and young specialists;
- creation of joint study programmes based on the experience and expertise of project partners;
- research activities and cooperation with industry partners to develop new skills and improve existing ones.

Benefits for teachers & students

- Access to unique interactive teaching materials for «classic», blended and distant learning;
- Ability to access wide network of project partners for future cooperation and research;
- International education experience, cultural exchange etc.

Added value for future

- Friendship and understanding between people, universities and countries.
- Acknowledgement and respect of cultural and national features.
- Strengthening peace and harmonic living of any physical or mental level.
- Making Universe a better and more advanced place.

Thank you very much!
